

Capture the live image as well!

Simple to use drag and drop lineups.

Links to Incident Reporting and Master Name help streamline the booking process!!

Use the features of your browser to share information with area communities!

Take control of the booking process

Capturing the offender is only the beginning. From arrival at the station through cell management, release or transfer, Acuity Booking can assist in maintaining order of the process.

Utilizing a state-of-the-art Master Name Index that contains prior offender's images facilitates the identification of the arrestee. Capturing images through the utilization of live video ensures accuracy. Quick links for the update of prisoner status, transfer or bail help to streamline the booking process.

Complete information integration is the key

From the moment of dispatch to the time the final incident report is filed, integration of data is the key. Complete sharing of data is provided between CAD, Booking, Incident Reporting, Master Name and other modules.

Information should not have to be entered twice. Eliminate the calls to dispatch to verify information. With Acuity Booking any information entered is shared between all modules the way it should be.

Booking can also be integrated to your existing live scan AFIS system as well as to create lineups.

Live Video ensures the integrity of the captured image.

Utilizing the latest available technologies in digital video and networks ensures that the captured image will be crisp and clear. With enhanced zoom capabilities, images can be captured of gang markings and tattoos for attachment to the booking.

Stay organized!

With Q.E.D.'s powerful summaries and drill-down web pages, you can see your data in a whole new way.

Quick links to Bookings, Bail and Prisoner Status keep things organized.

Acuity Booking provides a Windows 2000, WEB based, intranet solution comprised of:

- A high end Windows™ 2000 server
- Live video capture
- Active links to Offenders, Events and CAD history
- Direct links and integration to CrimeWeb Incident Reporting.
- Interfaced to Master Name facility.
- Quick links to cell management and release information
- Quick photo view

Acuity Booking handles routine tasks automatically, so the officers can focus on the arrest.
