

FIRST™ with NFIRS 5.0 Reporting

Web-Based Fire Incident Reporting System Technology

Easy access to important information.

FIRST™ with NFIRS 5.0/Fire Journals puts access to your critical information into your favorite Web browser.

File away your paper logbooks! Now you can browse Departmental activity on-line. See what's been happening at a station, for a particular company, or Department-wide.

Companies can use the Journal's NFIRS 5.0 report feature to electronically file Company Run and EMS Reports also.

Find what you're looking for quickly.

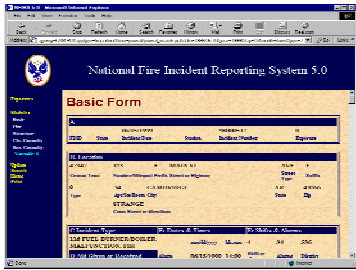

FIRST uses the interface already familiar to you – your Web browser.

Entry Type	Report #	Date	Time	Report Type	Info
ADMIN	133	1999-06-15	12:56:56	VISIT/LOG	show in no justice

Use the Web-based Journal to see NFIRS Reports and Administrative Log Entries at a glance, or use the QuickFind feature to pull up, review, and approve a particular report.

Put your data together.

Hyperlinks take you from Journal to NFIRS Report all with a mouse click.

Best of all, it works the way the Web works, so you don't need special training to find your way around.

More than NFIRS 5.0

FIRST also includes:

- Company Run Reports
- Journals and Logs
- EMS Reporting
- Daily Journal
- Multi-jurisdictional support
- Optional – Roster Scheduling and Bulletins

Supports Many Configurations

FIRST with NFIRS 5.0/Fire Journal package is available integrated to CAD or as a stand-alone product.

Important Attributes of **FIRST** with NFIRS 5.0/Fire Journal

Live Data Publishing

The data displayed in **FIRST** pages is drawn live from your on-line database. As soon as an update is made, it is available to personnel browsing the pages.

Flexible Access Security

FIRST pages can be accessed within your Department, or by selected outside personnel at your discretion. If your network has a Virtual Private Network gateway, you can provide secure access to mobile users via CDPD, or to personnel working from their homes or other remote locations.

Bundled Software

FIRST comes with the industry-leading **JRun Application Server** from Allaire Corp. (www.allaire.com), for fast, secure Web access to the database.

Ease of Administration

Software is installed on a central intranet Web server. Unlike traditional Windows™ software, new versions can be easily installed without having to update software on many PCs.

System Requirements

The **FIRST** with NFIRS 5.0/Fire Journal package does not require Q.E.D.'s Acuity CAD software.

- A Local Area Network (LAN) with a Windows-NT Server™ running Microsoft Internet Information Server (IIS) is required to provide Web services.
- Works with Informix™ On-Line Dynamic Server™ or Informix Standard Engine™ on Unix or NT Server platforms.
- Users access **FIRST** through Microsoft Internet Explorer™.

Pricing and Availability

FIRST with NFIRS 5.0/Fire Journal is available. Licensing is based on size of installation.
